*Wall Street Journal*

March 6, 2017

Robin Solomon discusses types of Target Date Funds (TDFs) in a *Wall Street Journal* article entitled "How to Manage Your Target-Date Fund After Retirement" by Jeff Brown.

"There are essentially two types of target-date funds. First, there are 'to' funds, which reach their final allocation at the target date, and can work well for investors planning to cash out at that point, says Robin Solomon, who advises firms on 401(k) plan design as a partner in the Washington, D.C., law firm of Ivins, Phillips & Barker. Then there are 'through' funds, which become ever more conservative after the target date, best serving investors who gradually draw funds for living expenses, she says."
