From the IAEP:

As a follow-up to IAEP's recent March 2015 Vapor Intrusion (VI) webinar presented by IEPA representatives, this presentation by an experienced environmental consultant and a leading environmental attorney provides a practical guideline for addressing VI at sites compliant to recent IEPA and USEPA regulatory updates.

Development and execution of VI work plans will be discussed, followed by interpretation and presentation of site data, and closure strategies addressing the indoor inhalation exposure pathway, such as the use of Building Control Technology and institutional controls.

Legal and contractual issues dealing with VI in the context of the transfer of properties and their redevelopment, will also be discussed.
