

ITAR and Other U.S. Export Control Laws (Chicago 2011)

November 30, 2011

Miller Canfield (Chicago)

11:30

Registration/Lunch

12:00 - 1:00

Presentation

Please join in-house counsel and corporate executives for an informal lunch presentation on U.S. Export Control Laws.

If your company is active in or considering entering the defense, aerospace, automotive, software, IT, or telecommunications industries, please join in-house counsel and corporate executives for an informal lunch presentation on U.S. Export Control Laws. Discussions will include:

- Basics of U.S. Export Controls
- Registration with the U.S. Government
- Impending U.S. Export Control Law Reform
- Consolidated Export Screening List
- Export Control Compliance Program

Penalties for non-compliance with ITAR and other export control laws are severe. How do you determine if your company is a "defense contractor"? Is your product, service, or technology covered under export control laws? What obligations are associated with the care, custody, access, use, transmission, and export of controlled items? This program will help answer these and other questions.

Space is limited. There is no cost to attend.
