

Shutts & Bowen Named Among 2022's Top 50 Construction Law Firms

Construction Executive

6.6.22

Shutts & Bowen LLP is pleased to announce it has again been recognized by *Construction Executive's* "The Top 50 Construction Law Firms™." Published in the magazine's June 2022 issue, the firm is ranked 34th overall among construction law firms nationally.

"We are honored to again be recognized among *Construction Executive's* rankings. We attribute our national recognition, in significant part, to the fact that our team is comprised of a diverse group of experienced construction lawyers who each have differing experiences and backgrounds. This allows us to provide our clients with first class legal advice for a broad spectrum of construction law needs, from drafting contractual agreements for projects, to handling and trying disputes on mega projects - and virtually everything in between," said [Timothy Woodward](#), Chair of Shutts & Bowen's [Construction Practice Group](#). "We are proud to represent our clients' business interests in Florida and are grateful for their ongoing trust in our team of attorneys."

Shutts & Bowen was one of only two firms included among "The Top 50 Construction Law Firms™" list that specialized in construction law in a single State.

"This achievement is indicative of the exceptional service that our Construction Practice Group provides to clients, as well as their knowledge of Florida-specific issues affecting construction matters today," said [Jack McElroy](#), Firmwide Managing Partner.

Now in its 20th year of publication, *Construction Executive* is the leading trade magazine about the construction industry. The magazine reaches 150,000 leading construction business owners, C-suite executives and top decision-makers including all 21,000 company members of Associated Builders and Contractors (ABC) nationwide. To determine their rankings, *Construction Executive* surveyed hundreds of U.S. construction law firms with a dedicated construction practice to determine rankings based on specific data, including practice group revenues, the number of attorneys in the construction practice, the percentage of revenue derived from the practice, the number of states the firm is licensed to practice, the year the practice group was established and the number of practice-specific clients.
