

MANUFACTURING

Good legal service means understanding our clients' long term goals. This is especially true for manufacturers competing in a global market. That's why we focus on practical, efficient measures to help clients maintain profitability.

In areas ranging from corporate finance to litigation and real estate, we counsel manufacturing companies on their operations in the U.S. and abroad. We represent clients on issues such as corporate restructurings, mergers and acquisitions, product liability, intellectual property, contract disputes, real estate transactions and land use matters.

For clients that are both local and multinational, we gather experienced counsel from offices around the state. Together, they form a comprehensive team to help clients manage risk, pursue growth and compete fairly.
